

OUR GREEN PLEDGE

As a company, Tyke is committed to Sustainability and makes the below pledge to work on our environmental impact.

We will:

- Continue to be paperless in all our productions and in the day to day running of the office.
- Ensure that all our productions continue to be Albert Certified.
- Reduce our travel consumption, utilising trains instead of planes, public transport instead of cars and where possible taking meetings online rather than in person.
- Carbon offset our business where we can and through approved Albert sources.
- Use Albert Certified energy suppliers for all projects and day to day office running.
- Choose ethical and sustainable manufacturers and suppliers for productions; with a focus on minimising single-use plastics.
- Make promotional material virtual where possible, with any printed items being made and sourced sustainably.

And finally:

- Encourage sustainable practices with crews, clients, and productions both at work and home with regular green memos attached to virtual call sheets and other important documents.

This pledge will be continually updated in line with Albert Sustainable Foundation guidelines and other reliable sources of environmental advice. For more information on our policy, please contact joe@tykefilms.com
